

Licence Key Protection (CM) Biofield ReaderCM & Biofield ImagerCM

Is my Licence Key for one device?

Your Licence Key allows you to install Biofield ReaderCM or Biofield ImagerCM (your Imaging System) with Licence Key Protection (CM) on one device. This can be a laptop or desktop.

Do I need to be connected to the internet to use my imaging system with CM?

Yes. Internet access is required for regular checks. The Licence allows only one computer to be registered and regularly checks online to confirm the code is correct. This type of security is very strong and negates the need for a plug-in dongle.

What if I lose my computer or it is stolen? Do I have to buy another Licence?

You must contact us as soon as you know that you have lost/had your computer stolen. We will cancel the Licence Key you had previously, so that it no longer works, and issue you with another.

What if my computer stops working. Do I need to buy another licence?

No, you can install your Imaging System on another device using the same Licence Key.

What happens if I want to use my Imaging System on two devices?

If you already have one Licence Key for your Imaging System, we will provide you with another Licence Key at a discount. This must be registered in your name and cannot be rented or sold to anyone else.

Please email us biofieldimaging@gmail.com re purchasing second Licence Keys.

What do I need to get started with my imaging System?

You need a computer, a camera and BFRCM or BFICM program.

What are the technical specifications for Biofield Imager?

Works with most standard desktop and laptop systems with Windows W7, W8, W10, W11.

BFRCM runs on Mac OS X within the Windows compartment.

BFRCM works with most standard desktop and laptop systems.

Does Licence Key work with touch screens?

Although our Imaging Systems have not been specifically designed for use with Windows touch screens, many users find that it functions well on a touch screen once they have reduced the font size for screen resolution. Otherwise the mouse can be used as normal. It works with Windows operating systems. It does not work with iPads.

How do I install BFRCM/BFICM?

You download files from our website. No CD or security dongle is required. During the purchase you will be given the Licence Key which will enable you to use your imaging software program. Internet access is required for regular checks

Can I use laptop and desktop?

Either type of computer will work. Some users prefer the portability of a laptop, while others use a desktop.

BFRCM and BFICM work with most standard desktop and laptop systems with Windows operating system.

Note: BFRCM/BFICM will not run on a Tablet or mobile phone. It has not been designed for touch screen programs.

Biofield Reader and Biofield Imager with Licence Key will run on Mac OS X within the Windows compartment.
